21. Coverage Standards & Protocols

Medicine is an evidence-based science. Clinical diagnosis supported by positive investigation test findings are its founding principles. Treatment in Medicine are given as per well-defined protocols.

Our goal is to deliver care that is appropriate, effective, and safe. Equally important is avoiding treatments that are not medically necessary, as this helps safeguard patient well-being. Insurance, by design, is to support healthcare needs and not to change treatment choices. Furthermore, a key principle in insurance suggests that having coverage should not influence healthcare decisions. Patients naturally consider the benefits of treatment along with its cost and choose care that offers the best value and medical results. This approach supports responsible, value-based care that focuses on what is truly needed for recovery and long-term health.

A. Medical Protocols

We are committed towards supporting safe, effective, and evidence-based medical care. To help bring clarity and consistency, we will be referring to trusted and widely accepted sources such as leading medical textbooks, All India Institutes of Medical Sciences

(AIIMS), Indian Council of Medical Research (ICMR), the Clinical Establishments Act 2010, Pradhan Mantri Jan Arogya Yojana (PMJAY), various health schemes like Mukh Mantri Sehat Yojana (MMSY Punjab), the Department of Health Research (Ministry of Health), and internationally respected institutions like Mayo Clinic, Cleveland Clinic, and National Institute for Health and Care Excellence (NICE).

These guidelines are designed to help explain:

- a. When hospitalization is needed, including guidance on the appropriate level of care (for example: admission in an ICU or non-ICU room)
- b. What treatments and procedures are considered appropriate, based on the medical condition and its severity, including recommended medicines and procedures

To ensure patient safety and quality of care, coverage under this policy shall be aligned with treatments and medicines that are approved by recognized regulatory authorities such as the Central Drugs Standard Control Organisation (CDSCO), Food and Drug administration (FDA), and other relevant bodies in India. Any treatment, medicine not approved by CDSCO, FDA and other appropriate authorities in India shall not be covered under the policy.

We also follow official guidance provided by manufacturers and regulatory authorities regarding how medicines and procedures should be used, including their approved indications and precautions. Treatments or medications used outside their approved purpose (often called “off-label” or extra usage) shall not be covered under the policy, as these fall outside established approval and safety guidelines.

Our approach is focused on transparency, safety, and supporting care that is medically appropriate and widely accepted, helping customers make informed healthcare decisions with confidence.

B. Position statements

Medicine is constantly evolving, wherein, new technologies and treatment approaches are emerging regularly. While many innovations offer promise, not all deliver outcomes that are meaningfully better when considered alongside their costs and established alternatives.

As a responsible insurer, we believe in being transparent and clear with our customers. Therefore, our decision on the coverage of illnesses or injury shall be basis texts and medical protocols published/recognised by globally trusted establishments like All India Institutes of Medical Sciences (AIIMS), Indian Council of Medical Research (ICMR), the Clinical Establishments Act 2010, Pradhan Mantri Jan Arogya Yojana (PMJAY), various health schemes like Mukh Mantri Sehat Yojana (MMSY Punjab), the Department of Health Research (Ministry of Health), and internationally respected institutions like Mayo Clinic, Cleveland Clinic, and National Institute for Health and Care Excellence (NICE). Our evaluations will be based on comprehensive Health Technology Assessments, health economic evaluations, cost-benefit and cost-efficiency analyses, along with other well-regarded global research published in reputable medical journals. Any research found to have conflicts of interest will be excluded from consideration.

Medical protocols published by these establishments will outline how we assess different medicines, treatments, procedures, investigations, and therapies. Depending on the clinical and scientific evaluation, we may either cover the Reasonable and Customary charge incurred on a treatment wholly or partially or may recommend suitable alternatives or may seek additional review or in some cases may be unable to provide coverage under this product.

Importantly, if our medically-informed assessment results in no coverage or partial coverage for a particular treatment, we will still ensure payment at least up to the cost of the most widely accepted and commonly used alternative treatment currently available for that condition.

C. Prolonged Hospitalization extending beyond 10 days

- a. It is important that you inform us in a timely manner. If we do not receive intimation within 10 days from the date of admission, we may apply an additional cumulative co-payment of 10% on the final admissible claim amount.
- b. We may request for indoor case papers, treatment sheets, and daily monitoring records to help us understand and support the medical need for the extended stay.
- c. If the medical records indicates that the insured's health parameters have stabilized and yet the hospitalization continues, expenses related to the extended period of stay may not be payable under this policy.

D. Organ Transplants

- a. For live donor organ transplants, we kindly request that you inform us at least 7 days in advance, even if the hospitalization is planned at a non-network hospital. This allows us to assist you more effectively through the process.
